To the Courteous READERS.

Readers,

ACcording to Cuſtom, I have here preſented you with an Ephemeris for the Year 1703. I have purpoſely omitted the Table of Houſes, to make room for ſome larger Obſervations, which I find moſt People do more generally expect and deſire from the Annual Writers, well knowing that all that are Artiſts have Tables of Houſes by them, or that they are ſupplied by the moſt Ingenious Mr. George Parker in his double Ephemeris, Printed Yearly, he being the moſt exact Calculator that this Age has afforded in publick: Therefore I have complied with that that ſhall give the more Univerſal Entertainment, for now I hope there may be diverſion for both ſorts, it being as plain as any one that is writ, and the Planets Places very exact, alſo a Revolution figure of the Suns Ingreſs, with ſome obſervations thereon, and ſeveral remarks, upon ſome former Conjunctions of the Superior Planets, Saturn, and Jupiter: as alſo upon this which was the laſt Year are all carefully encerted and preſented by your Annual Friend, and Servant.

a curious serene and pleasant season.

fine breezes and pleasant showers with some hasty hail storms but they will continue to the prejudice of the Fruits of the Earth.

The pleasant Month of May being the flower of the Year, is ushered in with a Sextil of Saturn and Venus, and as the season it self is delightful, so is the Aspects, and hath signification of happy import to our Superiors. May the other honourable Clergy shine like Jove in his highest Heaven,

Many Ships arrive this Month, richly laden to the rejoycing of the worthy Merchants of the Honourable City of London.

Not many days after this Month begins,
The Sun (who never rests) enters the Twins.
His Heat (from what it was of late) is doubled,
And we with heat, as well as cold are troubled.

The half Horse Archer with his Winter darts,
Of tender plants now kills the upper parts,
And they in earth, as dead do now remain,
Till in the Spring, they freshly rise again.

OF THE
ECLIPSES
For the Year, 1703.

THere will be six Eclipses this Year, *viz*, four of the S and two of the Moon; but only those of the Mo will be visible to us here in *England*, and they will be in t followiug order.

The first will be an Eclipse of the Sun, on *January* t 6th, a little before noon, but not visible to any part of the Kingdoms of *Great Britain* or *Ireland*.

The secoud will be a great Eclipse of the Moon, in t sign *Capricornus*, upon the 18 day of *June*, at about a quar after 1 in the Morning, when yon may behold it for abo 1 hour and half dark, the Moon being Eclipsed in *Capricor* incites Men to Slander, Scandalize, and asperse one anoth and signifies that some great Person or Man of Emenen shall come to an ill end.

The third will be an Eclipse of the Sunn, on *July* the day, about 3 in the Morning, and therefore not visible to

The fourth will be also an Eclipse of the Sun, upon 27 day of *November*, just after Sun set, and therefore no be seen by us.

The fifth is a very great and Total Eclipse of the Moon the first face of *Cancer* on the 12 of *December* about half hour after 6 in the Morning, when the body of the Moon w be darke for above 1 hour and a half, the Moon being Ec sed in the first face of *Cancer*, signifies that Mens minds stir'd up and excited to War, Treachery and Apostacy.

The sixth and last is an Eclipse of the Sun, upon the day of *December*, at about 3 in the Morning. and theref invisible to *England*.

Astrologi

Astrological Judgment

For the Year, 1703.

A Mount my Muſe, let not thy Virgin flower
Be trampled down by any lower power,
But ſoar aloft to the Celeſtial Stars;
And then declare, when they doe frown us Wars,
Or ſmile us peace. O Lord! aſſiſt my pen;
Make it a welcome Legate unto Men.

We are now through the Wonderful Mercy of Almighty God, arrived to the Year 1703, and muſt be included under the influence of the late great Conjunction of the two Superior Planets *Saturn* and *Jupiter*, which was Celebrated in the Cardinal fiery Sign *Aries*, upon the 13th day of *May* laſt, 1702 near 5 hours afternoon.

Of theſe Conjunctions there be three kinds, *viz.* Great, Mean and leſſer Conjunctions: as,

Firſt, The great Conjunction, is that after a full period, and Revolution of the whole Circle, that is; when *Saturn* and *Jupiter* have made their ſeveral Conjunctions, throughout the four Triplicities, and do again meet in Conjunction in the firſt, which is 734 Years, and ſometimes hath been 794 Years.

Secondly, Meau Conjunctions are thoſe, which are made after the leaving of one Sign, and conjoyning in another ſucceeding Triplicity; as from *Aries*, *Leo*, *Sagittary*, which is the firſt unto *Taurus*, *Virgo* and *Capricorne*, which is the Second; thence to *Gemini*, *Libra* and *Aquarius*, which is the third, and laſtly into *Cancer*, *Scorpio*, and *Piſces*, which is the fourth and laſt Triplicity, all which is accompliſhed in 190 Years, and ſome odd days.

Thirdly, The leaſt Conjunction of *Saturn* and *Jupiter*, are thoſe which happen, or fall in the Signs of the ſame Triplicity, and in theſe, the Superior Planets do meet, or are conjoyned once in about 19 or 20 Years, and thus they make 10

Conjunctions,

Conjunctions, in one and the same Trigon, and consequently it is near 200 Years, before they change their Triplicities, and then as before said, it must be near 800 Years before they compleat their Revolutions through the whole Circle.

The Conjunctions of *Saturn* and *Jupiter* do Certainly convert, and change things in the World, and the Observations of all Ages, are testimonies to confirm it, which made the Learned, and Divine *Melanction* says in his Commendation of *Astrology*; All of sound and incorrupt judgment have known and do acknowledge that Art, and Doctrine, to be wholly necessary, which teacheth the Periods, and Revolutions and Succession of the Year, for which Consideration our Ancient politique forefathers did publickly commend and allot this careful Study, to the most Learned Order of such Men, as were the Keepers and Treasurers of Religion, to observe, the Circuits, and distances of the Sun, together with the Equinoxes and Solstices, and Monthly spaces, and to apply, and examine those according to the Motion of the Sun, and further the same Author: Many have sharply inveighed against that other part of this Doctrine, which is named Divination. Although the Places and Aspects of the Stars, are not the beginnigs of all Chances that happend to Mankind, and Causes must circumspectly be discern'd, and distinguished, yet certain it is, that Divers Alterations, in the four Elements do proceed from Stars, and not only temparaments of Mens Bodies, but also dispositions of their Minds are greatly governed by those shining Lights of Heaven, *&c.* Nay even in our own Age, we have been Eye-witnesses, that very eminent Transactions have succeeded such *Celestial Congresses*, and *Phænamena*.

Further, it is worth our Observation, that all the Conjunctions of *Saturn* and *Jupiter*, at their entrance into the first *Trigon*; since the Creation, have ever been in the Sign *Sagittary* (not *Aries*) as appears by Calculation. There have been 20 Conjunctions in the Sign *Sagittary*, between the Creation of the World and the Birth of our Blessed Lord and Redeemer, and but 15 in the Sign *Aries*, in the same time and also since that happy time there has been 10 Conjunctions in the Sign *Sagittary*, and but 6 in the Sign *Aries*, indeed there may be a secret Mistery herein, for *Sagittary* is the Grand dignities of *Jupiter*, who is the Patron of Justice, Peace, Tranquility, Religion, *&c.* As

First, The first Conjunction of these Planets in the fiery Triplicity was *ante Christum*. 3958 .in the beginning of *February* in 8 degrees of *Sagittary*, and this was not many Years after the Worlds Creation, as 'tis generally supposed by the learned Bishop *Usher* in his Annals makes the beginning of the World 4004, *ante Christum*; which if so, it is 46 Years after the Worlds Creation.

The second Conjunction was (in this Trigon) in the Year before Christ 3164, it was in the beginning of *November*, that is 794 Years, and 8 months distance, and this Restitution fell in 5 degrees of *Sagittary*, which happens (as appears by Chronology) in the days of *Enoch*, when he was 65 Years old 3317 Years before Christ.

The Third entrance (tho' second Restitution of this Trigon) was 2370 Years before Christ, and it fell in the latter end of *December*, in 8 degrees of *Sagittary*; the distance of those two returns is 794 Years, and near two months.

This was the second Age of the World, and the Universal Deluge, called *Noahs* flood, happen'd 2349 Years before Christ, but the next Year after there was a Conjunction of *Saturn*, and *Jupiter*, in *Leo*: so that it is certain it was during the Conjunction of the Superiors, in the fiery Triplicity, and now the Years of Man's Life were made (as it were) half shorter than they were before.

The fourth entrance (though third return) was in the Year before Christ, 1575, there happened three Conjunctions in this Trigon.

The first was about *March* the 12 in 9 degrees of *Sagitta-*

The second was a Retrograde Conjunction, which fell upon the 20 of *May*, in 8 degrees of *Sagittary*.

And the last about the 26 of *September* following, in four degrees of the same Sign; this was in the third Age of the World, about the time that *Moses* and *Aaron* flourished, and King *Pharaoh* exercised his Cruelty in *Egypt*, also the Children *Israels* delivery from the *Egyptian* Bondage, *&c.*

The fifth entrance (but fourth return) into this Trigon, was 1 Years before Christ, about the beginning of *December*, in degrees of *Sagittary*; and about this time, the ten Tribes were led into captivity.

This was in the Monarchy of the *Medes*; and some few Years after this Conjunction, we may read that *Senecherib*

King of the *Assirians*, having 185000, of his Soldiers slain by an Angel, leaveth the Seige of *Jerusalem*, and fleeth away, but presently after is slain by his own Sons *Adrammelech*, and *Sharezer*.

About this time also lived *Habbakkuk* the Prophet.

The fifth entrance (but fifth restitution) was in the fifteenth Year after Christ Jesus was born, it was about the beginning of *December*, in 12 degrees of *Sagittary*.

Now *Tiberius* the Emperour begins to flourish, and *Augustus* dyed; under this Conjuction also was the Passion and Resurrection of our Blessed Lord and Saviour, and many other remarkable things performed in the World, as History relates.

The seventh entrance (but sixth return) was in the Year of our Lord 869, about the 20 of *October*, in 6 degrees of *Sagittary*.

About this time Reigned *Charles* the Great, and in the Year 814, after Christ he dyed at *Aquisgrane*, *January* the 28, and now the Western Empire is translated to the *Germans*.

The seventh and last return (altho' the eighth entrance) was in the Year 1603, *December* the 7, in 8 degrees of *Sagittarius*, and under this Trigon we have been Labouring until this time, and it is well known to all *Europe*, what manifold Changes, and Mutations, have hapned therein since this last return of *Saturn* and *Jupiter* into the fiery Triplicity.

We have been long under the Dominion thereof, and therefore no strange thing to hear of so many strange alterations in several Kingdoms and Countries in the World, which perhaps no Age could parallel, chiefly arising from Religion pretences, and unhappy differences thereia, &c. which by influences of those Conjunctions past now ceases, for *Cardan* saith, that the effects of a Conjunction indures untill another Conjunction returneth. For

As the Conjunction of *Saturn* and *Jupiter*, hath their operation till another cometh. As the entrance of *Saturn* into the first degree of *Aries*, worketh continually till he enter the same again, for nothing is in nature without his contrary.

Wherefore unless the effects should last till their return the course of Heaven were Mathematical, not natural, and the cause would want his effect, and nature should seem to be weak and without power.

Therefore as a certain quantity or equal proportion, is set between one *Trine* and another, so is there can equallity in Revolutions, yet every Revolution is reduced to the middle

ion, for the vertue of a Conjunction, endeth in Oppositi-
n: and Opposition must then be regarded.

By all which we may gather thus much, that seeing from
he influence of such like Conjunctions of the Planets, *viz.*
Saturn and *Jupiter*; there usually succeeds such Superlative
ransactions, deep Consultations, and matters of deep Mo-
ent in the World; what mischief soever is portended by
turn in this Conjunction, (which will not be a little to
ome Persons, and some Places) will not be so violent, nor
arted down with these dismal effects, as some former Con-
ctions have been, by reason that *Jupiter*, altho' weak;
r is he much stronger than *Saturn*, as being in Reception
ith the Sun, yet it must be granted that what general profit
nd felicity, *Jupiter* doth promise to Mankind herein, will
e retarded, and sometime wholly abrogated by the Malig-
ant power of *Saturn*.

And this Conjunction more, or less, will continue its ef-
cts untill another come, which will be 22 Years, at which
me their will be another in the Sign *Sagittary*, which we
ave cause to fear may be more terrible then this.

And as all Authors agree that those great Conjunctions, are
ways the Prodromus or forerunner of great Mutations, and
hanges, so I shall not presume that this will pass its Influence
ithout any remarkable effects, for we already see most of all
urope in Armes, without any hopes of Reconciliation, with-
ut a special Providence, which God in his good time grant,
ut then the changes and alterations that this Conjunction
all cause will not be so violent, nor of that Continuance or
uration as those before spoken of, this being in a Moveable
gn, *viz.* *Aries*, its effects will be those several Kingdoms,
d Countries that are under those Signs that are in opposi-
n, and square to the place of the Conjunction, as *France*,
rmany, *Spain*, *Silesia*, *Burgundy* *Holland*, *England*, *Scotland*,
eland, *Austria*, *Alsatia*, *Muscovia*, *Livonia*, *Lithunia*, *Poland*,
xony, *Naples*, *Padua*, *Cracow*, *Constantinople*, *Venice*, *Lisbon*,
land, *Gaunt*, &c. all which places may expect to suffer more
less, through the influence of this Conjunctions, also it is
ten attended with strange and wonderful Apparitions in the
r, as fiery *Meteors*, *Comets* and Blazing *Stars*, whose mat-
r is most eloquently discribed by *Dubartas* in the following
rses: *viz.*

If th' Exhalation hot, and oily prove,
And yet (as feeble) giveth place above
To'th Airy Regions everlaſting froſt,
Inceſſantly th' apt tinding fume is toſt,
Till it inflame: then like a Squib it falls,
Fire winged Shaft, or ſulphry Powder-balls.
But if this kind of Exhalation Tower,
Above the Walls of Winter's icy Bower,
'T inflameth alſo; and anon becomes
A new ſtrange Star, preſaging woful dooms;
And for this Fire hath more fuel in't
Than had the firſt, 'tis not ſo quickly ſpent,
Whether the Heavens inceſſant agitation,
Into a Star, transform'd th' Exhalation;
Kindle the ſame; like as a Coal that wink,
On a Stick's end (and ſeemeth quite extinct)
Toſt in the dark with an induſtrious Hand,
To light the Night, becomes a Fire-brand:
Or whether the upper Fire, does fire the ſame,
As lighted Candles, doth unlight inflame.
According as the Vapour's thick or rare,
Ev'n or unev'n, long, large, round or ſquare,
Such are the forms, it in the Air reſembles,
At ſight whereof, th' amazed Vulgar trembles;
Here, in the Night appears a flaming Spire,
Here a fierce Dragon, folded all in fire;
Here, flying Launces; there a fiery Stream:
Here a bright Comet; there a burning Beam.
Here, ſeems a horned Goat inviron'd round
With fiery flakes, about the Air to bound;
There, with long bloody Hair, a blazing Star,
Threatens the World with Famine, Plague, and War;
To Princes Death, to Kingdoms many Croſſes,
To all Eſtates, invetiable Loſſes;
To Herdſmen rot, to Ploughmen hapleſs Seaſons,
To Saylors Storms; to Cities, Civil Treaſons.

And here I ſhall leave the Conſideration of the Conjunc
on in it ſelf, and give ſome ſhort Judgment on the Sa
ingroſs into the Winter Solſtile, when the *Days* are t
ſhorteſt.

For ſcarce can bright Phœbus's glittering Eye
Upon our Hemiſphere project his Rays;
But black Night ſteals him hence, which makes the Sky,
Oft mourn in Sable, weeping for thoſe Days;
Thoſe former Days, when longer he could ſtay,
And cloath the fragrant Earth with pleaſant green;
For which upon her back he now doth lay,
A cold white Coat, as now and then is ſeen.
Yea, Ponds and Lakes with icy Glaſs abound,
And Creatures of all ſorts are much diſmay'd,
Wanting that Heat which oft in him they found,
Their Beauty's gone, their ſtrength is much decay'd.
Therefore bright Phœbus mount, get up, behold
The Spring kept back with ſhivering fits of cold.

Which Winter Quarter begins when the Sun enters the
ſt ſcruple of the Celeſtial Sign *Capricornus*, *viz.* on the 10th
ay of *December*, 1702, at 17 Hours, 22 Minutes, P. M. at
hich time you will find 20 Degrees of *Virgo* Culminating,
d 26 Degrees 41 Minutes of *Scorpio*, upon the Horizon.
The moſt material Poſitions, is *Mars* Lord of the Aſcen-
nt in a trine Aſpect to the Aſcendant, ſignifying, and pre-
ging the good Underſtanding, Satisfaction and Content that
e happily enjoy among our ſelves, and the Union and Care
the Nation in general; alſo *Venus* and *Mercury* both in the
ſcendant, tho' near the cuſpe of the 2d Houſe, does predict or
romiſe many and great Friends, or Allies, as being Lords of
e 10th, and 11th Houſes, which is the Nations Honour, and
iends, or Allies, always then *Saturn* and *Jupiter* both in the
h Houſe in a Trine to the ſecond Houſe, or rather firſt,
nfirms the ſame, as before, they being Lords of all the
rth-eaſt part of Heaven; *Venus* alſo here is in a Trine
her place at the Conjunction, and *Mercury*, who is Lord of
e 10th, in this, is in a Trine to *Saturn* and *Jupiter* in the o-
er, or at leaſt to the degree where the Conjunction was ce-
rated, the Moon alſo here ſeparates from a Sextile of
ercury, to a Sextile of *Venus*, all which Poſitions, does nota-
y predict, that altho' this may not be a time fit for Action,
t undoubtedly there will be very great and deliberate Con-
ations held amongſt our Senatours, and thoſe worthy Pa-
ots that ſit at the Helm of Government, and thoſe Conſul-
ions carryed on with that ſecrecy and diligence, and ſo pe-

luckily that they will be ready for Action before the Enem
shall be aware of them.

For here is the Lady of the Seventh, which is the gener
Significator of the Enemy, posited in the Ascendant, alth
in *Sagitary*, which signifies that we shall dispose of them,
have them in our own Custodies in a Trine to *Aries*, which
England's general Significator, and disposed of by *Jupit*
who is in *Aries* also, and he disposed of by *Mars*, who is Lo
of the Ascendant in the Figure, all of which positions, is
most certain Argument of our Forces obtaining some consid
rable Advantage, or Victory over the Enemy by Sea, as w
as by Land, or the taking of some considerable Place or Plac
or routing their Forces wherever they shall meet, or oppo
them.

Mercury here Lord of the 10th House, does signify our m
Gracious Queen, and the Moon the Common People
England; and as the Moon separates from a Sextile of *Merc*
and immediately applies to a Sextile of *Venus*, Lady of t
11th, which is the second from the 10th, and hath signifi
tion of her Treasure, and the Nations Friends and Allie
general. This very plainly shews their willingness, and r
diness in submission (according to their bounden Duty)
adhere to all Her Royal Edicts, and also their forward
in giving such suitable Supplies, as will make Her not o
Great and Formidable at Home, but also much Court
Feared, Beloved, as well as Honoured Abroad. Appear
in that Grandure and Majesty, that all *Europe* may know t
She is the most Serene Queen of *Great Britain*, which Ki
from the Divine *Quarles* Stiles —— *The Curb of* Spain,
Pride of Germany, *the Aid of* Belgia, *the Scourge of* France,
*Empress of the World, and Queen of Nations: She is legit
Walls whose Builder is the Hand of Heaven, wherein there d
rides a Navy Royal, whose unconquerable Power proclaims
Prince Invincible, and whispers sad Despair into the Hearts of
reign Majesty.*

And since it was so very powerful in his Days, what
we expect from it now, when its Forces both by Sea
have been so wonderfully increased, and more effec
by Sea, where we see that thro' the indefatigable Care
Diligence of Her Majesty and most Honourable Councils,
the Nations from our have seen, That the Enemy could n
such as send a Ship out of their own Harbour, without

ing taken and brought to *England*, nor those which before were out, not dare to go Home for the same cause.

And so I shall proceed to the Sun's ingress into the Cardinal Sign *Aries*, which is upon the 9th Day of *March*, 1703, at 19 Hours 27 Minutes P. M. at which time the Face of Heaven presents it self according to the following Scheme, in this Latitude of *London*.

Where he, whose Genius is sublimely given,
May lodge a while i'th Mansion of bright Heaven;
Where he may view each Planet in his Seat,
(By God's Decree) appointing *Europe*'s Fate;
And read (with indefatigable Eyes)
The Obscure (yet rare) Enigma's of the Skies.

Apollo now rides equally between,
The World's two Poles, and is a long time seen;
Within our Hemisphere, ere that he leave us,
As in the other half World, which is beneath us;
And mounting higher, doth again revive,
Things sensible, as well as vegetive.
Man cheerfully trips over the enamell'd Fields,
Which many sweet Delights unto him yields:
There grows all Flowers to the Eye or Scent,
The which (almost) might give the Soul content;
Sweet Harmony to please the dainty Ear,
Melodious birds, are chanting every where;
So shrill proceeds the Musick from their Throats,
Rocks ring the Eccho's of their well tun'd Notes.

Here I find in this Scheme, the Sign *Taurus* a fixed Sign upon the Cuspe of the Ascendant, with *Venus* Lady of the Ascendant, very weak in the 12th House in *Aries*, her detriment, also afflicted by the Conjunction of *Saturn* Lord of the 10th House, in his fall, and much debilitated; yea here is the Moon very strong, as being in her Exaltation, Triplicity and Face, and by that means hath more Dignities, and is more essentially strong in the Sign ascending than *Venus*, whose House it is (and having a very good Author for this Rule) I shall take the Moon for Lady of the Ascendant, and by the same Rule also of *Mars*, for Lord of the 10th House, as having more Dignities in the Sign *Capricorn*, than *Saturn*, whose House it is.

It is generally allow'd, and granted that when ever *Mars* is in any of the Angles, of a Revolutional Figure, but more especially in the Ascendant, that he excites and stirs up Wars in that Year.

But it was ever the Glory and Safety of *Great Britain* to be inviron'd by the Sea, and to command those Waters that encompass it; and whilst other Nations are subject to daily Incursions, being separated only by Rivers, Hills, or Valleys, and imaginary Lines; by turns one Kingdom often elbows out another.

But Nature has fet *Britain* such distinct bounds, and limits that its Empire is preserv'd intire; and has its bounds in all Things, both for the necessary Delight, and Support of Man, and needs not the World to sustain it. So was it always esteemed

eemed, and called *Novus Orbis*, and *Orbis Britannicus*, by ason of its greatneſs, and eſpecially its ſeparation from the ontinent; for proceeding from the Eaſt, through that vaſt act of Ground, which contains ſo many Empires, and King- oms, and arriving on the Coaſt of *France*, *Normandy*, *Picardy*, d the *Low Countries*; one's Fancy tired with ſo long a pro- eſs, would naturally imagine, That on that Shore, was the ermoſt bounds and limits of the Earth, and that there s nothing Weſtward, but a vaſt Ocean.

But as ſoon as the *Britiſh* Iſland diſcover'd it ſelf by its high d white Rocks, it is no wonder it ſhould be called a diſtinct orld, by it ſelf, being of ſo large an extent, that for ma- Years after the *Romans* had diſcover'd it, it was not known ether it was an Iſland, or the beginning of another Conti- nt Weſtward.

Or that it was ever joyned Eaſtward to the Continent of *ance*; as there is no Tradition for it, ſo there is no reall uth in it, and ſo I ſhall leave it encompaſs'd with the Sea, h theſe Verſes (out of Mr. *Camden*) upon the Streights, e matter of which, I queſtion not, will be verify'd in all ges to come.

——— *Geminâ quâ janua ponti*
Faucibus anguſtis, latéque frementibus undis
Gallorum, Anglorumque vetat concurrere terras.

———The *Britiſh* and the *Gauliſh* Shores
The Sea at diſtance keeps, thro' every Age,
Leſt the two Lands each others ſhould ingage.

Yet as the Major part of *Chriſtendom* is already in Arms, upon Hoſtilities, the poſition of *Mars*, as before hinted in s Caſe, will have its effects in thoſe Countries where the d of War hath already diſplay'd his Banners, and excite en to purſue with greater Courage and Violence, thoſe igns and Stratagems, whereby they deſign to conquer each er, and to ſtrive withall their power to put a period to their Hoſtilities.

And therefore I ſhall modeſtly, according to the Rule of Ancients, hint at the Succeſs, or otherwiſe, which we Inhabitants of theſe *Britiſh* Iſlands, may in reaſon expect m the Influence of the Stars, which in former Ages have

been

been held in great Veneration, as *Petrus Petratus* in the P
em to his *Diaria*, giveth out this learned Judgment: *Am*
the sorts of future Events, some have an infallible proceeding a
joined them, as the moving of Heaven, the rising and setting
Signes, the conjunction of Planets, and the Eclipses of the Sun a
Moon, and such like; in which Points, is an infallible and dete
minate certainty in respect to the Movement, and all hindrance
are removed from them every way, unless God's predominat W
and Divine Providence, shall stay them miraculously and extra
dinary, which nevertheless, useth always Natural and ordinary
instruments; unless, secondary Causes be strangely foresta'll'd of t
Principal and first Cause, which is God.

So that with this Exception, we may depend upon the
Effects as follows, The Ascendant, and the *Moon*, Lady of
in any Revolution, does always signifie the People in gener
and as she is so well fortify'd, *viz.* Exaltation, it shews th
they are all very well satisfied with their Governours, and tho
chiefe chief in Authority; also that they are free from
manner of Molestations, or Fears, or Jealousies, and th
they live at Ease and Quiet, and also enjoy more Freedom
than any of our Neighbour Nations, where the Seat of W
is more immediately present: For altho' there be a neces
sity of raising great Supplies in order to keep the War in o
Enemy's Country; yet it signifies that they are willing wi
great Chearfulness to pay it, without repining; and so th
tho' abroad there is all the Calamities that can attend a W
we in *England* live (by the Providence of Almighty God) i
a Land of Peace.

Some may object that *Mars* being in the Ascendent does a
fect it, but I deny that, an answer that *Mars* there does an
mate, and put life into them, and in no case is prejudici
for he is Lord of the 10th House, which is the House of H
nour, and fountain also of Honour, and signifies the Courag
Conduct and Valour of our Soldiers, and can it be a Crime
Soldiers, or their Commanders, or any People under Heaven
be Valiant, and Courageous, much less the Warlike *Britt*
that so often in their Minority was able to give the *Roman*
gions so many repulses. And on the other hand if *Mars* d
not assist them, they would be timirous, and fearful, and
ways able to withstand the envy and malice of their En
mies.

Also *Mars* is Lord of the 10th House, and under that House, may not only be included the fountain of Honour it self, but also the several branches of Honour, as the most Honourable Commanders in chief, with other Honourable Commanders, both by Sea and Land, who do by their great Prudence, Conduct and Valour, animate those under their several Commands to Act in their several stations, even beyond what could be expected from Men. It also produces a good Summer-Trade, and all Commerce increases in general, to the great Satisfaction of all People.

Then the Moon is here very near the same Degree and Sign she was in at the great Conjunction, and cast a *Trine Aspect* to the tenth House, which shews the Peoples Loyalty, and Willingness to offer even their All, whatsoever is good, and dear to them, to Her whom Heaven it self hath preserved through the greatest of dangers, as our own Blessing, to sit upon the Imperial Throne of these Nations, as a Nursing Mother, and to be a scourge to those, who would not only insult over their own Subjects, but over all other Kingdoms, and Dominions wherever the fury of their Ambition should drive them.

On the other part the seventh House and its Lord, which is the significater of our Enemies, is in opposition to themselves, and *Saturn*, *Venus* and *Jupiter*, are all in a Quartile Aspect to the 10th House, which intimates, that very few, or none of their proceedings will be successful, but on the contrary, their Stratagems and proceedings, will most of them prove abortive; and they will be obliged to retreat, who us'd to call themselves Invincible.

For here is *Mars* their Significator dispos'd of by the Moon, who is Our Significater and their Enemy, and therefore if they could discharge themselves from the Yoke, that they have many Years unfortunately labour'd under, and make themselves Gentlemen once more, and reassume that liberty which once their Predecessors did, now they have an opportunity which, if they neglect, and spurn at, it may be a long time e're providence give them such another Opportunity, according to *Dunton* in his 2 day, p. 16.

O Frantick *France*! why dost not thou make use,
O strangeful Signs? whereby the Heavens induce;
Thee to Repentance; Canst thou fearless gaze?
(Each Night, by Night) on that Prodigious Blaze;

That

That hairy Comet; that long streaming Star
Which threatens Earth, with Famine, Plague, and War.
(th' Almighty's Trident, and three forked fire
Wherewith he Strikes us, in his greatest ire) ?
But what (alas!) can Heaven's bare threatning urge,
Sith all the sharpe Rods, which so hourly scourge;
Thy senseless Back, cannot so much as wrest,
One single sigh from thy obdurate Breast?
Thou drink'st th' one Blood, th' own Flesh thou eat'st
In what most harms thee, thy delight is great'st,
O senseless Folk! sick of a Lethargy,
Who to the Death despise your Remedy!
Like froward Jades, that for no striking stir,
But wax more restless, still the more we spur;
The more your wounds, more your securenes grows
Fat with afflictions, as an Ass which blows;
And as the Sledge Hardens, with strokes the Steel
So the more beaten, still the less ye feel,
Repent! Repent! prophaning God in Oathes
Usual prophaning of his Sabbaoths;
Such Cost the *Jews*, and *Asia*'s Desolation,
Now turned *Turkes*, that were the Holy Nation;
But, oh! what boots, or what avails my Song,
To this deaf Adder, that hath slept so long:
Happy who take, by others dangers warning,
All that is Writ, is Written for our learning.

and a little after——

Swell not in Pride, O *Paris* (Princely Dame)
To be chief City, and thy Sovereigns Throne:
City? Nay Model of this total Frame,
A mighty Kingdom of thy self alone.
Were thou a hundred thousand fold more mighty,
Who in th' Olympick Court commands the thunders,
In his least wrath can wrack thee (most Almighty),
Thebes, *Babel*, *Rome*, those proud Heaven daring Wonders
Low under ground in dust and ashes lye:
For earthly Kingdoms (even as Men) doe dye.

Now if in his days, He thought that Country had so much need of this admonition, and advice, when they had one of the best of Kings, to govern, what would he have said more now

after ſo many diſſolations and Barbarities, added to what ever was done before, but ſince it has pleaſed the Great God of Heaven to keep the Seat of War, out of this Kingdom, let us all with Heart, and Tongue ſend our Petitions to the Throne of Grace, for the many Bleſſings continually ſhower'd down upon us.

Almighty God! whom the Heavenly Choir adore,
Preſerve our Gracious Soveraign evermore.
Direct Her Councils, but Confound Her Foes,
That dares what's Juſt by Sea or Land oppoſe.
Angels the Glorious Guards to Queens, and Kings,
In Her defence ſtretch forth your radiant Wings!
Great *George* th' Illuſtrious Prince of *Denmark* bleſs!
Who in the fire, than Gold was try'd no leſs.
Our Reverend Biſhops, fence with all their flock
From Storms, and Tempeſts; found them on the Rock.
Our Nobles, Rulers, Judges, Gentry all;
Inſtruct, Protect, with Commons great and ſmall
May Rebells keep in Chains who grudge to ſee,
Fair *Albion* ſtill in Ancient Liberty.
The Royal Martyr's wounds to Heaven exclaim,
'Gainſt thoſe who caus'd them, and at more do aim,
Give grace that all Men may abandon Sin
Whence Famine, Plague, and War do firſt begin.

And now according to Cuſtom, you are preſented with the Sign *Cancer*, both of it ſelf, and with every Planet poſted therein, that the Young Artiſt may ſee the variation the Planets make.
